

Press Release

KSEI Implements Full Work at Home Until Conditions Improve

Jakarta, April 3, 2020 - In compliance with the Jakarta Provincial Government Decision Letter 361 of 2020 on Extending the Covid-19 Emergency Period to April 19, 2020, and based on instructions from the Financial Services Authority (OJK) on adjustments to the capital market industry's operational activities during the emergency period, the Indonesia Central Securities Depository (KSEI) will implement a full Work From Home (WFH) policy. This policy also replaces the Split Operation policy implemented previously during the start of the Covid-19 emergency period.

KSEI President Director Uriep Budhi Prasetyo stated that "All of KSEI's activities will continue as normal during the full WFH's implementation." All work will be performed through the use of existing technology, such as teleconference meetings and long-range work through remote systems.

Uriep added that KSEI had ensured Service Users that the full WFH policy would not disrupt its normal activities. To anticipate the full WFH, KSEI has opened connections for participants to KSEI's Main System and has recently conducted a DRC live test to ensure that its business operations will not be disrupted.

In the days ahead, KSEI will monitor the development and current conditions in Jakarta, as well as complying with instructions from the Government and OJK.
